

This is a sample text. Today we will be covering basics of thermodynamics. Thermodynamics is the study of the relations between heat, work, temperature \propto energy.

This is my sample test

$$y = mx + c$$

$$dU = TdS - pdV + \sum_{i=1}^k \mu_i dN_i$$

Dear User,

Handwrytten uses robotic handwriting machines that use an actual pen to write your message. The results are virtually indistinguishable from actual handwriting.
